Sunday Laws Are. Editors Dispatch: The recent determination of the Judge of the Hustings Court and the Police Justice of the city rigidly to enforce the Sunday laws renders it very desirable that the people should have an accurate knowledge of what they are. Legally they are presumed to know the laws, and be punished, notwithstanding in point of fact they may be ignorant of them. The following are the statutes and ordinances upon the subject : In the criminal procedure act of the last

State-chapter 7, section 17, page 36, it is

enacted: "If a person, on a Sabbath day, be found laboring at any trade or calling, or employ his apprentices or servants in labor or other business, except in household or other work of necessity or charity, he shall forfeit two dollars for each offence; every day any servant or apprentice is so employed constituting a distinct offence." Section 18 excepts the transportation on Sunday of the covered. mails, and of passengers and their baggage, and also the Jews and others who conscientiously believe that the seventh day of the week ought to be observed as the Sabbath. Section 19 of the same chapter enacts: No bar-room, saloon, or other place for the sale of intoxicating liquors, shall be opened, and no intoxicating bitters or other | Moreover, many persons were prostrated in drink shall be sold in any bar-room, restaurant, saloon, store, or other place, from 12 o'clock on each and every Saturday night from heat happen in the afternoon, partly of the week until sunrise of the succeeding | because that is the hottest part of the day, Monday morning; and any person violating the provisions of this section shall be deemed guilty of a misdemeanor, and, if hours. At all such times when such bar shall be open the heense under which the business is conducted shall remain posted in some conspicuous place in the bar-room. And any person violating any provision of this section shall be fined not less than ten nor

that the property-owners were nearly unan-

imous in opposition to the new grade. Mr. Ellett explained that this was a part of the general and permanent system of grades: that the Engineer would make the changes with as great regard to the interests of property-owners as possible; that that portion of the city would be greatly improved and the people generally much benefited. He stated that Franklin street would AGAINST COMMITTEE FOR BELIEF OF be lowered only about two feet four inches

at its intersection with Shafer. Mr. Curtis informed the Council that this \$1,000 was just a beginning; that a great deal more money would be required for these and intersecting streets. Yet he believed that the investment would be a very good one, especially as the property-owners had given of their property liberally for the extension of Grace street. At first be was

A list of certain bills which had been

ordered to be paid was read. Mr. Curtis

objected to a bill of \$2.50 for riding the

members of the Committee for the Relief

of the Poor from the City Hall to the almshouse. He moved that the Council disap prove that item. Mr. Adams said that this had long been the custom; that the committee were required to visit the almshouse once a month. and that some of the members live a long distance from the almshouse.

Mr. Curtis replied that, all the same, there was no authority for this expenditure. If the Council desired the committee to have backs, why, put it in the ordinance and he would not object. But he had taken a solenin oath not to sustain any expenditure where there was not the fullest authority therefor. Mr. Curtis offered the following:
